Tonight started with multiple events and various locations around town. Peninsular Park had the group we were most concerned about with about 200. Holiday Park had a small gathering of 50 - 70, Lents park had an event and Salmon street springs was to have a vigil and there was a group of dressed as doctors at the steps of the Justice Center. We had intel that Seattle and others were in from out of town. Later livestream reported we had folks from Seattle, Eugene and Salem at least.

By 1937 hours we had about 400 folks at Peninsular Park who began marching with a few support vehicles. They took the long route to North precinct where they entered the open lot and vandalized a police car, cut down the US flag, vandalized the fence and disabled the gate at the entrance for secure upper parking. Night shift was starting to come in and they began to verbally harass employees going from the lower parking to the upper parking. At this time knowing that they were now interfering with the operations of the precinct we made an announcement with the sound truck to stop the criminal activity and move to MLK and the crowd dispersed to MLK and marched northbound to Lombard then west to the PPA building. It is believed that the group from Lents parks may have joined the march on the way to the PPA. The energy of the crowd was high.

Once at the PPA building they dragged several dumpsters into the road way and lit them on fire. Someone climbed to the roof and the front door was breached. Multiple persons entered the building and a fire was started almost immediately. Riot was declared and the group was pushed east and then south while embedded fire put out the fire inside the PPA and a fire rig responded to put out the dumpster fires. The push of the crowd was hard and they threw many rocks, paint bombs and M80s at the officers. Because the push was through residential areas **no** CS gas was used. One officer was injured and fractured the end of his tibia fighting with one of the crowd. Several members were exposed to what they believe were goffer gassers that were ignited and they had to pass through the smoke which caused vision issues. Many of the team ended up with paint on them due to the number of paint bombs thrown.

The group went back to Peninsular park and dispersed from there. We reset assets to North precinct.

While this was happening the Holiday park group marched to down town and joined the group at the Justice Center after marching to NW 10/ Glisan. The group at the Justice center was 300- 400 and had a group of "moms" protesting in white t-shirts along with the others. Over the next couple of hours, the fencing around the parks was torn down and at 2145 hours the group breached the Federal courthouses embassy fencing. The rest of the Federal fencing was then taken apart and stacked, thrown, dumped against the four sides of the courthouse as well as the park fencing. The group used some of the fencing to set up barricades blocking streets roughly 2nd to 4th, Salmon to Madison. A fire was built at the elk. At 2242 hours. Individuals threw things at the federal courthouse, used lasers and at some point it was believed they were being breached again where they exited the building and appeared to deploy gas during the melee.

Just after midnight a vehicle was brought to 3/main and speeches were given by it appeared to be several folks from Seattle about organizing here. A fire was later set at 4/Salmon and

eventually put out by other members of the group. At 0121 hours they yelled shift change and some went to the 2nd street side anticipating Centrals C shift change. It did not happen because they were being held over. Slowly the energy of the crowd drained out and we cleared all personnel by 0338 hours. Throughout the night there were several fights and conflicts among the group as well. One of the plaintiffs of one of the TROs was reported by the officers as throwing a water bottle at them.

Later in this event US Marshals called about a suspicious device they spotted in the tangled mess of fence on the front side of the courthouse that appeared to have a pin and string attached to it. After the crowd was gone and it was safe, EDU was called in to investigate the device. At the writing of this it is unknown what the device was.

Rating the level of lawlessness for tonight compared to the past 52 days, this was probably in the top 5 days. Our initial fears that the anarchists want to burn something down is now without a doubt as this is their 3rd clear attempt with complete disregard to where it happens. The North group was well prepared to fight and fought hard when we pushed them out of the area. The destroying of all the fences and trying to illicit a fight from the feds was clearly not protected speech.

My hope is that Sunday night will be less. My hope is that the out of town folks return home.
