Grenadier Operators Course
Safety Plan

[redacted]

SAFETY PLAN	
SUBJECT:	**2017 Regional Grenadier Operators Course**
DATE:	**March 27 – 29, 2017**
INSTRUCTORS:	**Zanetti, Nice, Lee, Young, Schoening**

OVERVIEW

Portland Police Bureau RRT will be hosting a grenadier operators course. This training will include skill and scenario based training, as a result of that, the following guidelines have been established for the safety of all the instructors, students, and observers.

GENERAL SAFETY GUIDELINES

The following rules will apply without exception when conducting any exercise or training within the confines of the Camp Bonneville training site. These rules will apply in every situation, however there may be additional safety rules applied during specific training and/or scenarios.

1. **At least one (1) safety officer must be designated for any training or exercise at the Range site(s). The safety officer will be responsible for implementation of the safety plan and ensure that all safety protocols are followed without exception. Due to the number of involved personnel the safety officer may designate additional safety officers to assist with the implementation of the safety plan.**
2. **At no time will any live ammunition of any caliber be allowed inside the confines of the designated training site, unless designated Live Range. This includes non-role player observers.**
3. **All vehicles utilized for any reason within the training site will be visually and physically inspected by the Safety Officer and/or their designee for any and all live ammunition prior to their entry to the training area. Once found safe, the vehicles must be physically marked with a clearly visible piece of flagging tape or similar item. All personnel involved with the training must be made aware of the significance of the tape.**

4. **The safety officer and/or their designee will routinely update Range Control as per base policy.**

5. **During any training, and smoke or CS is deployed, it will be done so as per department policy.**

6. **If during any training or scenario, a distractionary device (RBDD / Flash Bang) is deployed, it will be done so per department policy. If during the scenario role players are utilized, the safety officer will ensure that all role players are equipped with eye and ear protection prior to any distractionary device deployment.**

7. **If during any training or scenario, a less lethal munition (12GA Bean Bag, Pepperball, 37/40MM Stinger, 37/40MM Direct Impact, FN303) is deployed, it will be done so per department policy. If during the scenario role players are utilized, the safety officer will ensure that role players are equipped with eye, ear protection, and shin guards prior to any less lethal deployment.**

8. **All non-involved observers of any training being conducted at the designated training site are required to wear a safety vest of a distinctive color. This vest must be visible at all times and all personnel involved in the training must be made aware of its significance. Observers will also wear eye and ear protection while in proximity of the Range(s).**

9. **All personnel, including all role players and non-involved observers, must be made aware of this safety plan prior to any training conducted at the designated training site. To accomplish this, this plan will be read to all related personnel during the initial team briefing on the First Day of the training week. Additionally, a copy of this safety plan will be posted in the FBI Range Classroom next to the door.**

ACCEPTABLE EQUIPMENT

MRT / RRT PPE
60 cal. Pepperball and FN303
Distraction Devices and Simulators
37mm & 40mm Impact and Launchable Munitions
Hand Toss Smoke / CS, OC
